## Big Business Features for a Small Business Budget

Small and medium-sized businesses, (SMB's) looking for telephony solutions have never had many options. Phone systems from larger manufacturers are honestly too expensive, and current key systems are feature-lean, lower quality solutions that can't scale as business grows. Times have now changed.

The TVS is a system designed specifically for the SMB market. Affordable communication solutions that are easy to use, easy to manage, are scalable, reliable and deliver enterprise-class features. Features such as support for remote offices, home workers, and even workers on the road. Include that with the ability to save money with Internet Telephone Service Providers (ITSP's) and the ability to conduct large scale conference calls in house, are finally available to the SMB.

TVS is changing the face of IP telephony with it's innovative line of open standards, PBX in A Flash powered IP PBX systems. Businesses looking for an advanced phone system at an affordable price should look no further than the TVS.

### The TVS is...

#### **Very Versatile to Grow with Your Business**

Designed for businesses with as little as 5 users to as many as 500 employees, businesses with basic telephony needs to larger enterprises that need advanced functionality and management tools, the TVS meets the demands of any business environment.

#### **Easy to Implement, Use and Administer**

The TVS' user friendly web interface allows business owners and administrators the ability to implement, configure and manage their system without ever needing to bring in "The Phone Guy".

#### **Reliable**

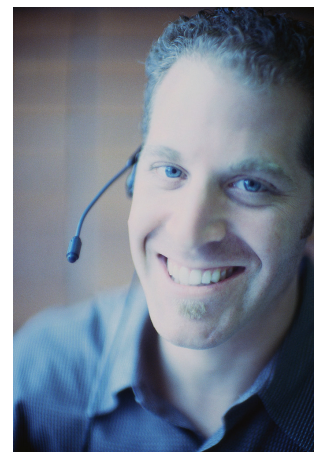

With TVS' disaster recovery solution and update monitoring, you can rest assured that your system is running in top shape at all time.

#### **Affordable**

With prices up to 70% less than traditional solutions and no additional costs to setup and install a system, even the smallest business can afford a feature rich TVS telephone system.

#### **Fully Supported Technical Support**

CCSG's installation support team offers free support with every system to ensure that your solution is installed quickly and easily and, once installed; the technical support team is available to make sure your questions and concerns are answered.
